

## Logging Into the VM

You must be on campus or use the Pomona College VPN<sup>1</sup>. Afterwards, you should be able to log into the course Virtual Machine using `ssh <Pomona User ID>@itbdcv-lnx04p`. You should be able to log in using your college credentials.

## Copying Files from the VM

If you want to get files from the VM onto your local device (e.g., to submit to Gradescope), run the following command *from your local device*: `scp -r <Pomona User ID>@itbdcv-lnx04p:/path/to/source /path/to/destination`. Note, “path to source” describes the path to the files on the VM and “path to destination” describes where you would like the files to be copied to on your local device.
