

## Logging Into the VM

You must be on campus or use the Pomona College VPN<sup>1</sup>. Afterwards, you should be able to log into the course Virtual Machine using `ssh <Pomona User ID>@itbdcv-lnx04p`. You should be able to log in using your college credentials

## Using the VM

You are not a `sudoer` on the VM, so will not be able to download libraries to this machine. You should have all libraries needed by running `scl enable gcc-toolset-11 bash` after logging in.

---

<sup>1</sup>Download the Cisco Anyconnect Client and connect to `anyconnect.pomona.edu`.
